Fall 2010

Biomimicry: Nature's Engineering Principles

Innovators look to nature for design solutions in engineering, architecture, chemistry and medicine.

Women Engineering Leaders in Academe 2010

The 2008 female deans of engineering: Diane Dorland, Ph.D. from Rowan University and Sandra Woods, Ph.D. from Colorado State University.

Small vs. Large Workplaces

Small companies and large companies offer distinctly different advantages. Deciding which one is best for you will help you flourish in the workplace.

About SWE Magazine

SWE, the Magazine of the Society of Women Engineers (ISSN 1070-6232), is published quarterly with an additional issue in October. Articles in SWE cover issues of interest to women engineers including the achievements and accomplishments of women engineers, career development, career guidance for and outreach to students, activities within the Society, and technical themes geared to an audience covering a broad range of engineering disciplines.

Advertisers, please visit our SWE magazine advertising page to discover the benefits of advertising in SWE.

Letters to the Editor

SWE invites you to submit editorial response and feedback through letters to the editor. Please submit your response via email, including "Letters to the Editor" as the subject line, to swemag@swe.org or submit via regular mail to:
